## PROJECTS

### E-Commerce Website, Food Delivery Website and Netflix Clone

A series of web development projects including an E-commerce website and a Food Delivery website

- Developed an E-commerce Website that allows users to browse products, add them to the cart, and place orders. The front end was built using HTML, CSS, and JavaScript, while MongoDB was used on the back-end to manage product and order data
- Developed a full-stack food delivery website that allows users to view menus, add items to a cart, and place orders. Implemented a responsive front-end using HTML, CSS, JavaScript, and React.js. Used MongoDB on the back-end to manage user and order data
- Developed a fully responsive Netflix clone using HTML and CSS, ensuring seamless user experience across mobile, tablet, and desktop screens.
